

The Point.

Welcome to the Point

At The Point, we understand the value of networking, connecting, sharing experience and, most importantly, helping you and your employees grow. The early days of developing a business are painstaking for an individual or a company, which is why we strive to create environments that encourage, inspire, and support the growth of the companies we facilitate in our modern state of the art business facilities. In these uncertain times, modern enterprises need far greater flexibility and agility than ever before.

The Point provides a suite of options permitting you to have complete flexibility to develop your ongoing business needs. From small, medium to large enterprises, The Point is the ideal solution for start-ups, dedicated projects or purely availing of a co-working desk.

Operating a full office in the early days of developing a business isn't always cost effective. Renting office space, purchasing office equipment, setting up IT services and recruiting staff is time consuming and costly. Our business solutions program offers a variety of services that you can customize to fit your business and budget.

Using our services allows you to quickly and easily accommodate any increase or decrease in clients and employee head count, allowing you to scale up or down operations as required. Our administrative staff and cost effective work spaces are ready to grow with you.

Straight to The Point

We provide you with a way to cut expenses, but retain a high level of prestige and professionalism, while also providing flexible office space, shared office space and executive offices at attractive and affordable terms.

Our "business support" team can provide small businesses with extra staff and on the spot assistance with additional governance, administrative and financial services as requested.
